shotgun cartridges

ELEY cartridges for game and general purpose shooting

Grand Prix

Acknowledged throughout the world as the most versatile cartridge brand, Grand Prix is available in 12, 16 and 28 gauge and the equivalent 'Twenty Gauge'. In various loads and a wide variety of shot sizes, Grand Prix is the general purpose cartridge *par excellence*. Ideal for partridges, pheasants, pigeons, rabbits and available with buckshot loads for small animals.

Impax

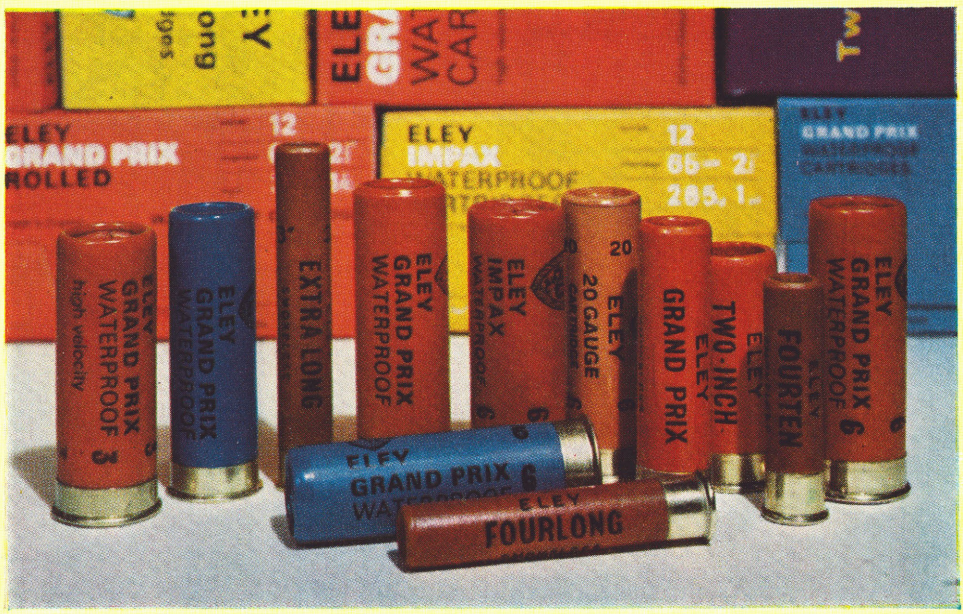
Impax, with its 1 oz (28·5 g) load, has two special features – marvellous patterns and low recoil. Easy on the shoulder, hard on the target, Impax make a long day's shooting a pleasure rather than a marathon.

Two Inch

An excellent game shooting cartridge made specially for light 2 in (50 mm) chambered guns.

·410 Gauge

Fourten 2 in (50 mm), Fourlong $2\frac{1}{2}$ in (65 mm), and Extra Long 3 in (75 mm), give excellent results at targets taken at the closer ranges.



ELEY extra power cartridges for wildfowling and long range shooting

Maximum
A really lively $2\frac{1}{2}$ in (65 mm) cartridge that gives the sort of shooting you would expect from a $2\frac{3}{4}$ in (70 mm) high velocity cartridge. A favourite with wildfowlers and pigeon shooters.

Alphamax
The high power, high velocity, heavy load $2\frac{3}{4}$ in (70 mm) cartridge for duck, geese, and long range shooting. Extra strong, $\frac{5}{8}$ in (16 mm) deep head. 12, 16 and 20 gauge.

Hymax
The least expensive $2\frac{3}{4}$ in (70 mm) heavy load long range cartridge. $\frac{5}{16}$ in (8 mm) head. 12 and 16 gauge.

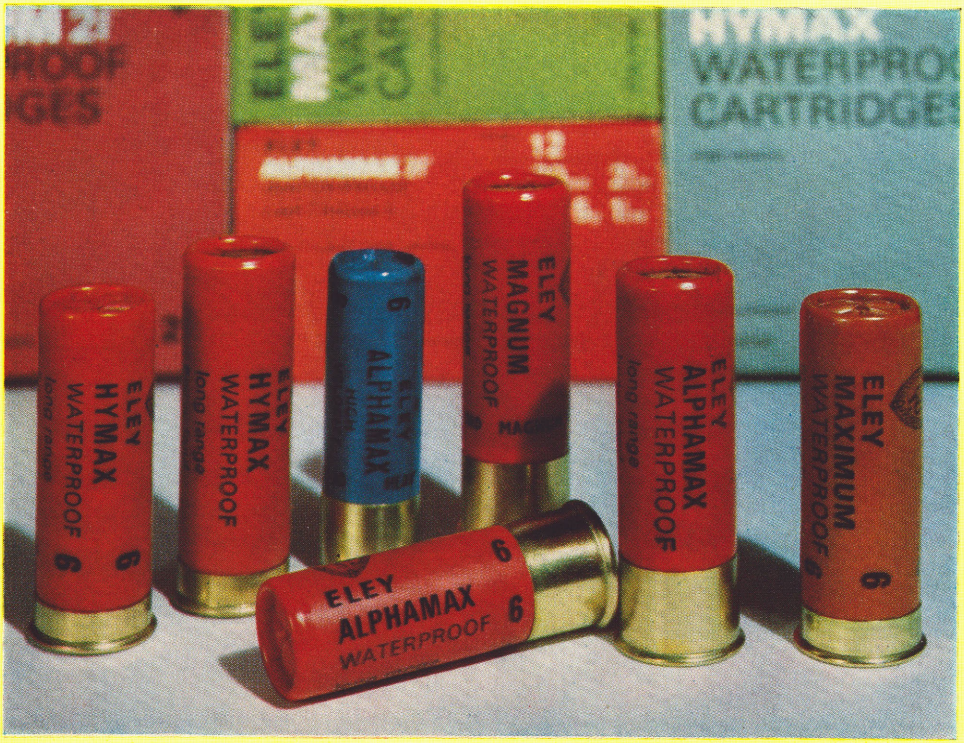
Magnum
The new Magnum cartridges in $2\frac{3}{4}$ in (70 mm) and 3 in (75 mm) lengths give 12 gauge users having suitable guns an extra heavy shot charge – $1\frac{1}{2}$ oz (42·5 g) and $1\frac{5}{8}$ oz (46 g) respectively. Effective range is increased by several yards, depending of course, on the type of target and the shot size used.

Warning. *These Magnum cartridges must be used only in suitable guns, i.e.*

$2\frac{3}{4}$ in (70 mm) cartridges in guns with $2\frac{3}{4}$ in (70 mm) or 3 in (75 mm) chambers proof-marked for a shot load of at least $1\frac{1}{2}$ oz (42·5 g) and marked for a service pressure of at least 900 kilograms per sq. cm.

3 in (75 mm) cartridges in guns with 3 in (75 mm) or longer chambers, proof-marked for a shot load of at least $1\frac{5}{8}$ oz (46 g) and marked for a service pressure of at least 1000 kilograms per sq. cm.

Large gauges
8 and 10 gauge cartridges are also available. 8 gauge suitable for $3\frac{1}{4}$ in (80 mm) chambers. 10 gauge in two lengths – $2\frac{7}{8}$ in (75 mm) and $2\frac{5}{8}$ in (65 mm).



ELEY cartridges for clay shooting

Trapshooting
This cartridge has established itself over the years as the ideal cartridge for Down-the-line and Sporting clay target shooting. Reduced velocity and recoil. The number of '100 straight' scores made with these cartridges is testimony to their regular ballistics and consistent patterns.

Skeet
Loaded to the requirements of International Skeet shots. Slightly faster than Trapshooting. No. 9 shot.

Olympic Trench
A specialist cartridge for a specialist sport. Loaded with selected components and $1\frac{1}{4}$ oz (35·5 g) of specially hardened No. 7 shot.

Trainer
For economical practice shooting, especially at Sporting clays. Light load, even patterns. Ideal for instruction.

Tracer
Brilliant red tracer pellet in the centre of the pattern enables the shooter to find out where his shot is travelling and correct if necessary. Ballistic level is the same as Eley Trapshooting.

Grand Prix high velocity
These $1\frac{1}{8}$ oz (32 g) high velocity cartridges have proved popular for clay target as well as game shooting, and give trouble free functioning in auto loaders and slide action guns.

ELEY clay pigeon traps and clay pigeons are available together with helpful leaflets. Ask your Eley retailer for details.
